

# project — Full Dependency Report

Generated: 2026-02-01 Tools: [UpshiftAI](#) (direct deps)

## In one page (read this first)

 **Risk: High** — 23 unmaintained or legacy dependencies among your direct deps.

**The issue:** 23 of your 57 direct dependencies haven't had a release in 24+ months. That means no security fixes, no compatibility updates, and increasing technical debt.

**If you do nothing:** You stay exposed to known vulnerabilities, stuck on old Python where applicable, and blocked from upgrading the rest of your stack.

**Do this first:** Review the ancient direct deps in the table below; upgrade or replace them. Re-run with `--full-tree` to see transitive chains.

**Bottom line:** 23 direct dep(s) are stale; upgrade or replace to reduce risk.
